

Are you feeling disillusioned with politics as it exists today?

Are you tired of things only ever changing for the worse?

Are you tired of the choice between self-serving bureaucrats and outright racist fascists?

Maybe anarchism is what you need

Not a promise to solve all your problems for you.

Not a demand that you give over all power to someone else to "save" you.

But a politics about building the power of those at the bottom so that we no longer need anyone at the top.
